F. of two or more expressions, therefore, Resolve each expression into its simplest factors. Find the product of all the common factors, talcing each factor the least number of times it occurs in any of the given expressions. Note. The highest common factor in Algebra corresponds to the greatest common measure, or greatest common divisor in Arithmetic. We cannot apply the terms greatest and least to an algebraic expression in which particular values have not been given to the letters contained in the expression. Thus a is greater than a, if o stands for J. 123. Oommon Multiples. A common multiple of two or more integral numbers is a number which is exactly divisible by each of the numbers. A common multiple of two or more expressions is an expression which is exactly divisible by each of the expressions. 124. The lowest common multiple of two or more numbers is the least number that is exactly divisible by each of the given numbers. The lowest common multiple of two or more expressions is the expression of lowest degree that is exactly divisible by each of the given expressions. We use L. C. M. for lowest common multiple. To find the lowest common multiple of two or more algebraio expressions....$
